QUESTION

Can SSAS (SQL Server Analytics Service) be routed through ScaleArc?

ANSWER

For MSSQL Database traffic, ScaleArc is a TDS Traffic Loadbalancer. TDS is the protocol that SQL Servers use to negotiate and issue SQL queries. SSAS does not use TDS. Generally,

SSAS uses SOAP and XMLA on HTTP transport and could not be connected though ScaleArc.

Here is an MSDN references to the SSAS Protocol:
[https://msdn.microsoft.com/en-us/library/ee326686\(v=sql.105\).aspx](https://msdn.microsoft.com/en-us/library/ee326686(v=sql.105).aspx)

Here is an MSDN reference to the TDS protocol:
<https://msdn.microsoft.com/en-us/library/dd384523.aspx> (alt)

If you are experiencing issues with ScaleArc or with any of its features, please contact ScaleArc Support. We are available 24x7 by phone at 855 800 7225 or +1 408 412 7315.

For general support inquiries, you can also e-mail us at support@scalearc.com.
