CentOS 7 equivalents to deprecated networking commands

Release	Classification	Level	DB Package	Category
N/A	Not To		All	Configuration

QUESTION

Why some of the networking commands don't work on Linux CentOS 7 anymore, while they

all worked on CentOS 6 before?

ANSWER

1. Linux is deprecating the net-tools package in newer versions due to lack of maintenance.

2. Some of the distributions, like CentOS 7 minimal or Ubuntu Docker, don't have net-tools

package installed by default.

3. It is recommended to go forward with new command replacements, see further info

below:

Commonly used networking commands and their equivalents in CentOS 7:

CentOS 6 (old)	CentOS 7 (new)
netstat -na	ss -l -n
netstat -a	ss -a
netstat -nr, route -n	ip r
ifconfig -a	ip a
arp -a	ip n

If you are experiencing issues with ScaleArc or with any of its features, please contact ScaleArc Support. We are available 24x7 by phone at 855 800 7225 or +1 408 412 7315.
