How to NFS export ScaleArc Volume

Sanjay More - 2016-10-27 - 0 Comments - in Frequently Asked Questions

How do I NFS export ScaleArc Volume?

You can export ScaleArc /currentlogs folder onto another linux box and issue log processing

script over there..

On ScaleArc Box

1. `service rpcbind start`
2. add following entry in `/etc/exports`
`/data/logs/currentlogs *(ro, sync)`
3. `/etc/init.d/nfs restart`

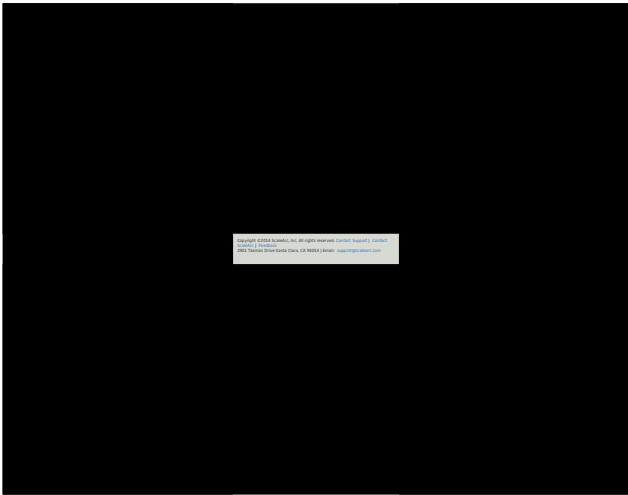

On client

1. `mkdir /scalearc_logs`

2. `mount -t nfs4 <scalearc ip>:/data/logs/currentlogs /scalearc_logs`

If you are experiencing issues with ScaleArc or with any of its features, please contact ScaleArc Support. We are available 24x7 by phone at 855 800 7225 or +1 408 412 7315.

For general support inquiries, you can also e-mail us at support@scalearc.com.
