Traffic Analyzer File Size Error

Ami Thakkar - 2017-08-01 - 0 Comments - in ScaleArc System Messages

Traffic Analyzer

Uploading of network captured SQL traffic file is allowed as long as the system has

sufficient disk space.

Uploading of files is aborted, in situations where the system is running low on disk space or

when the file being uploaded will make the system's disk space usage go above 80%.

To free up disk space do the following:

Delete reports which are not required.

Increase the size of the disk.

If the problem persists please contact ScaleArc customer support

at support@scalearc.com.
